Full Stack Scrum Joins North Carolina Technology Association

Durham, N.C. – 12/03/19 – Full Stack Scrum™, a business which trains startups to be Agile, became a corporate member of the North Carolina Technology Association (NC TECH), the premier statewide leadership organization representing the technology industry. This new relationship demonstrates Full Stack Scrum's joint commitment with NC TECH to foster growth and champion innovation in North Carolina's tech sector.

"Given the Agile emphasis on embracing change, I wanted to add my voice in support of North Carolina as an underappreciated hotbed of technology innovation," said Jim Morgan, "Radical Agilist" and creator of Full Stack Scrum.
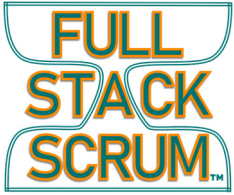

Introduced in 2017, Full Stack Scrum (FuSS™) promotes the use of Agile structures and processes in small-to-medium organizations so they can move faster without burnout. Agile is an approach-to-work management based on reduced planning waste, incremental development, short cycles, high quality and high customer interaction. It started in product design in the 1980s, now is used in many industries, and is the dominant form in software development.

"We're proud to welcome Full Stack Scrum to NC TECH's community of ambitious leaders in the technology industry," said Brooks Raiford, president & CEO, NC TECH. "Through the membership of companies like Full Stack Scrum, NC TECH has had the opportunity to expand its mark throughout North Carolina's technology sector and make a difference in innovation within the state and beyond."

About Full Stack Scrum

Full Stack Scrum™ (FuSS™) is a scaled Agile alternative to other frameworks, allowing an organization to move faster without the costs of new hires, consultants, certifications, or wasted days of classroom training. Detailed explanations, downloadable tools, and step-by-step instructions for do-it-yourselfers are included free and open-source on the Web site. Coaching services scaled to a startup's needs are available. For more information, visit FullStackScrum.net (note the "net") or email info@fullstackscrum.net.

About NC TECH

The [North Carolina Technology Association](https://www.nctech.org) has a mission to foster growth and champion innovation in North Carolina's tech sector, while providing a voice for the tech community. The organization works to achieve its mission through four core pillars: professional networks, government affairs, talent development and sector promotion. For more information, visit https://www.nctech.org.
